

Arpool Nexus

TECHNOLOGY

Flow Sense

A built-in protector against power-related issues, ensuring lasting performance and safety.

Split & Seal

Uses protective polymers to shield Filix products from water and moisture, boosting durability and resilience.

Heat Sense

Automatically reduces LED power at high temperatures, ensuring longevity and safety in Filix products.

Arpool Nexus

Specification Sheet

UL STD 676 swimming pool rated
CSA C22.2#89 swimming pool rated
IP68

LUMINAIRE FEATURES

Design and Application

- Medium-scale pools
- Infinity line recessed linear light

Mechanical details

- IK10 opal PMMA cover, 10mm (0.39") thick
- IP68, rated for permanent submersion
- Maximum installation depth up to 5m (16')
- AISI316L stainless steel body
- Suitable for chlorine and marine environments
- Supplied with 3m(10') oil and water resistant feed cable as standard
- Recessed installation secured with A4 grade screws
- Equipotential bonding point available with stainless steel housing

Electrical details

- LED Lifetime TM-21 @ 105°C
L70(9K) = 60,500 hours
- Operating temperature: -20°C (-28°F) to +50°C (122°F)
- LED CRI: >85
- 2 step MacAdam
- Remote power supply
- Low voltage operation

Sustainability

- Recyclable material

Controls

- DMX, with compatible LED power supply
- DALI, with compatible LED power supply
- 0-10V, with compatible LED power supply
- Mains, with compatible LED power supply

Integrated systems

- Split & Seal
- Flow Sense
- Heat Sense

ORDERING INFORMATION

MODEL	
AX	
LENGHT	
A	• A - (25,4") 645,5mm - Start (AXA)
B	• B - (24,9") 632mm - Central (AXB)
C	• C - (25,4") 645,5mm - End (AXC)
POWER	
L	• L - 10W/m, 2700/3000/4000K, 400lm/m • L - 18W/m, RGBW • L - 18W/m, TW
H	• H - 23W/m, 2700/3000/4000K, 950lm/m
COLOR TEMP.	
27	• 27 - 2700K
30	• 30 - 3000K
40	• 40 - 4000K
T6	• T6 - Tuneable white (2200-4000K)
M5	• M5 - RGBW (W 4000K)
OPTICS	
LL	• LL - Diffused (120°)
VOLTAGE	
12	• 12 - 12VDC fixture voltage
24	• 24 - 24VDC fixture voltage
OPTIONS	TYPE A ONLY:
03	• 03* - Standard feed cable 3m (10')
06	• 06 - Luminaire supplied with 6m (20') feed cable
09	• 09 - Luminaire supplied with 9m (30') feed cable
15	• 15 - Luminaire supplied with 15m (50') feed cable
20	• 20 - Luminaire supplied with 20m (65') feed cable

Arpool Nexus

INSTALATION DETAILS

Fixture

Arpool Nexus A type - AXA

Arpool Nexus B type - ABA

Arpool Nexus C type - ACA

Made out of AISI316L stainless steel with additional passive coating, this luminaire is suitable for use in marine and chlorine environments. The standard luminaires are equipped with water and oil-resistant cables in various standard lengths. with integrated systems such as Flow Sense, Heat Sense, and Split & Seal, the luminaire has all the needed protective barriers.

INSTALLATION DETAILS

Housings

Installation housing A501 - Start

Installation housing B503 - Central

Installation housing C505 - End

Arpool Nexus

MANDATORY ACCESSORIES

AISI316 installation housing

Stainless steel niche used to seamlessly integrate luminaire utilizing precision press fit with no exposed hardware. The housing, chemically etched and passivated, is suitable for marine and pool environments. Standard features include a 1.5m oil and water-resistant cable conduit, streamlining the installation process. Due to its size, the housing's back end intentionally lacks a sealed cable gland. Contractors are advised to review installation instructions for proper guidance.

Power supply

A LED power supply, is an electrical device designed to control the power supplied to an LED or an array of LEDs. It plays a critical role in LED lighting systems as LEDs demand a specific type and level of electrical current or voltage for optimal operation. It's important to note whether a constant current or constant voltage LED power supply is required. The power supply should be installed in a dry and easily accessible area.

Control

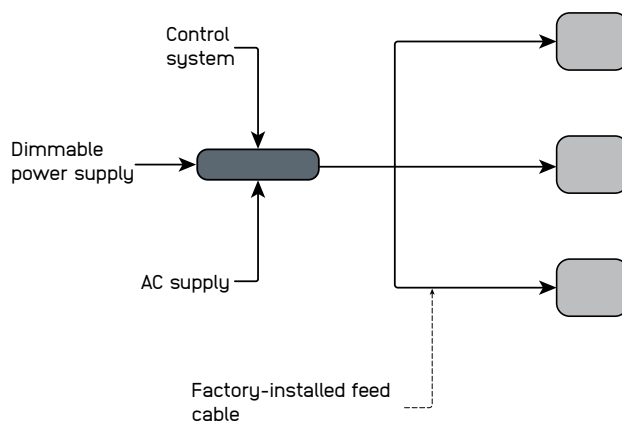

PWM SYSTEM TOPOLOGY - CONSTANT VOLTAGE

System components

- The luminaire is supplied with a factory-installed feed cable in standard lengths for connection to the PSU circuit, and mounting hardware as specified in the installation instructions.
- A remote constant voltage power supply (12V / 24V DC), DC distribution cabling between the PSU and luminaires (if required), junction boxes, connection infrastructure, and the control system (DALI, DMX, 0–10V or switching) must be provided by the installer or customer.
- Recommended components:
 - Surge protection on the AC side of the PSU
 - Appropriately sized DC cabling to limit voltage drop
 - Connectors and junction boxes suitable for the installation environment

System topology

- In the system design, any of the following system topologies can be utilized: line wiring, star wiring, or tree wiring.

Addressing & dimming notes

- Constant voltage systems use a parallel connection topology typical for constant voltage lighting systems. Distribution layouts may include star topology, tree topology, or daisy-chain distribution.
- Individual device or channel addressing can be achieved by connecting each product to a separate output channel of the DALI or DMX dimmable power supply.
- The PSU adjusts output power according to the control signal using PWM dimming.
- Dimming options depend on the PSU and the selected control system.

Segment length and limitations

- The minimum controllable segment is one product
- Maximum cable length and number of luminaires depend on the PSU, total system wattage, conductor cross-section, and acceptable voltage drop.
- Voltage drop must remain within 10% of the nominal input voltage to ensure uniform light output.
- Dimming options depend on the PSU and the selected control system.

Fault tolerance

- Failure of the control system or communication bus does not interrupt luminaire operation if the PSU continues to supply power.
- Failure of one luminaire does not affect other luminaires connected to the same distribution line due to the parallel connection topology.
- System reliability depends on correct PSU sizing and proper electrical installation.
